Mayor Henry Lee received a letter m William Lamb, a civil engineer of Norfolk, West Virginia, in which the latter protests against the award of the contract for wood blocks to the American Creosote Company. claims that the award should have been made to the Wyckoff Company. The latter company gave no guarantee with its bid. Mr. Lamb takes the ground that the bid of his concern was nearly \$6,000 lower, and that the value of a guarantee is less than this sum.

It now appears that the Aldermanic committee on Streets and Sidewalks could have saved nearly \$6,000 in awarding the wood paving contract if it had considered the lowest bidder for the contract without a guarantee,

for the contract without a guarantee, let alone \$500 by awarding to the U. S. Wood Preserving Co., which was the lowest bidder with a guarantee. Mr. Lamb's letter follows:

"I have just returned from the sad duty of burying my father, Col. William Lamb, of Norfolk. Va., and learned that while my principals, the Wyckoff Pipe and Creosoting Co., were the low bidders, bidding upon a superior block and having an example in your city of as fine a pavement as is your city of as fine a pavement as is in this country, that the contract was awarded to Silliman & Godfrey Co., who bid for the American Creosoting

"The difference between our bid and he bid of the parties to whom the parties to whom the parties was awarded amounts to \$5,-10, or about one-sixth of our bid. "I recognize the fact that the city werves the right to reject any and bids. That is most always done, out when a preference is given to a ligher bidder, at least to one in which here is such a great difference in the bids, there is most always an obvious suse for the same.

"If the officials awarded the contract

the ground that a guarantee was ren for a period of five years by the nerican Oreosoting Co., they should peder the fact that the specifica-ns said that parties could bid either

with or without guarantee.

"Any practical engineer in creosote ood block paving business knows that five year guarantee means nothing, hat the wood block without creosoting could last that long.

his is evident from the fact tha all of the bidders that bid with a guar-antee charged the same price for guarenteed as for the non-guaranteed de-livery. When you consider that a bond and guarantee company will give you a five year bond for a few dollars, to pay \$5,890 for a guarantee would be out of all reason.

of all reason.

"No one will claim that the Wyckoff blocks are inferior to the American if they are posted in regard to the various manufacturers of wood paving block. I enter a formal protest against this award and would ask your honor if there is any redress other than the courts in this matter.

Very Truly Yours, RICHARD LAMB,

he committee to the letter. Relative to the bringing of an meintive to the bringing of an injunction against the signing of the contract there will be a conference this afternoon between the largest property owners in Main street? One of these owners said to a Farmer reporter this afternoon: "We do not know just what action we shall take. We believe that all conditions take. We believe that all conditions being equal the contract should go to local lealers, but the bid of Silliman & Godweaters, but the bid of Silliman & God-frey to furnish American Creosote Wood blocks was \$500 more than the bid of the U. S. Wood Preserving Co. Therefore, the conditions were not equal. It is the principle of the thing we are interested in and on top of its all comes to us the startling fact that this committee was in a way to save this committee was in a way to save the city nearly \$6,000. Everyone knows the Wyckoff block laid in Fairfield avenue is the best in the city, if not in the State. We should take in consideration the statement of Mr. Lamb that any block without treatment will last five years. It is the principle of the thing we are interested it. If it was absolutely necessary for the city to have a guarantee then ed it. If it was absolutely necessary for the city to have a guarantee then the contract should have gone to the U.S. Wood Preserving Co. If the committee and used judgment in the matter as they would have done if they were paying for the work out of their own pockets, they would have at least considered the Wyckoff bid. ong the Main street property who are anxious to see the c principles carried out in the business principles carried out in the letting of the contract are: Samuel H. When I returned to my home on Monday afternoon I felt, even before I knew that my wife had left home, that something had happened. It was a queer feeling a premonition one might say of trouble. "On Saturday night my wife left the house, saying that she was going to the Methodist parsonage to tell Mr. Dane that there was a story in the papers of the divorce proceedings which his wife had brought against him. She said that she was afraid it might make a difference with the serwices on Sunday and that if Mr. Dane hadn't read the news in the paper he ought to be told about it. I was returning home later in the evening, after closing up my store, when I met my wife on her return.
